

GRAND VITARA

The Suzuki brand is considered by many to be one that is reliable, familiar, and like a member of the family.
An active effort is being made to develop every Suzuki product on the concepts of "sporty driving", "fun to use" and "pride of ownership."
To symbolize this, the "S" emblem on the vehicles has been redesigned.
The new Grand Vitara will also bear the symbol of what promises to be a tradition of excellence.

Standard and optional equipment available may vary for individual markets. Please enquire at your dealers, as specifications and illustrations may refer to models not available in your region. Specifications in non-metric units are approximate. SUZUKI MOTOR CORPORATION reserves the right to change, without notice, prices, colours, materials, equipment, specifications and models, and also to discontinue models.

Way of Life!

Revitalise your senses

In today's proactive, hyper-productive world, it's easy to lose touch with your surroundings. Suzuki suggests a return to the basics: take the time to feel the wind, smell the flowers, hear the vibrant voice of Nature. And nowhere better than in the stylishly sophisticated all-new Grand Vitara. The intelligence and capabilities of this all-round 4x4 naturally reflect the lifestyle and personality of its owner—a relationship seemingly beyond the scope of the current crowd of rough-and-ready SUVs.

No matter how inactive your senses have become, you'll be amazed at how they respond to Suzuki's stimulating Grand Vitara.

1.6-litre VVT

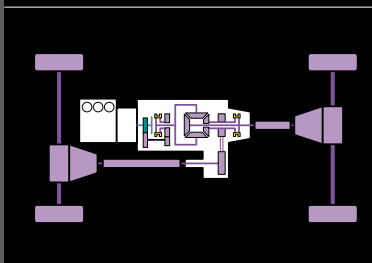

Grand Vitara's **4-mode 4x4 with centre differential** powers all four wheels at all times for outstanding performance on-road and off. The main switch built into the centre console provides effortless transfers between all four modes.

4H mode
The ideal mode for most driving conditions, the front:rear torque split of 47:53 offers smooth, quiet on-road performance plus impressive off-road traction.

4H Lock mode
For serious off-roading, this high-range 4x4 mode evenly distributes traction to front and rear wheels for powering through even deep snow or mud.

4L Lock mode
With a transfer gear ratio nearly twice that of 4H Lock mode at 1.970, this low-range 4x4 mode ensures enough low-end traction to get out of extremely difficult conditions.

Invigorating

Freedom exhilarates. Boundless energy evolves spontaneously from go-anywhere mobility. Release your inner adventurer and be prepared for some delightfully unexpected encounters.

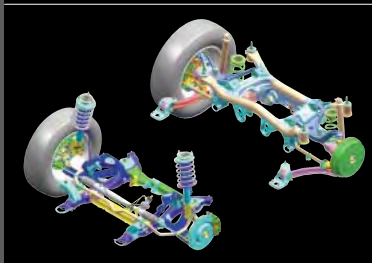

The **5-speed manual transmission** increases driver control, for sportier performance with improved fuel economy. A new output-reduction design improves durability and shift-feeling while reducing vibration.

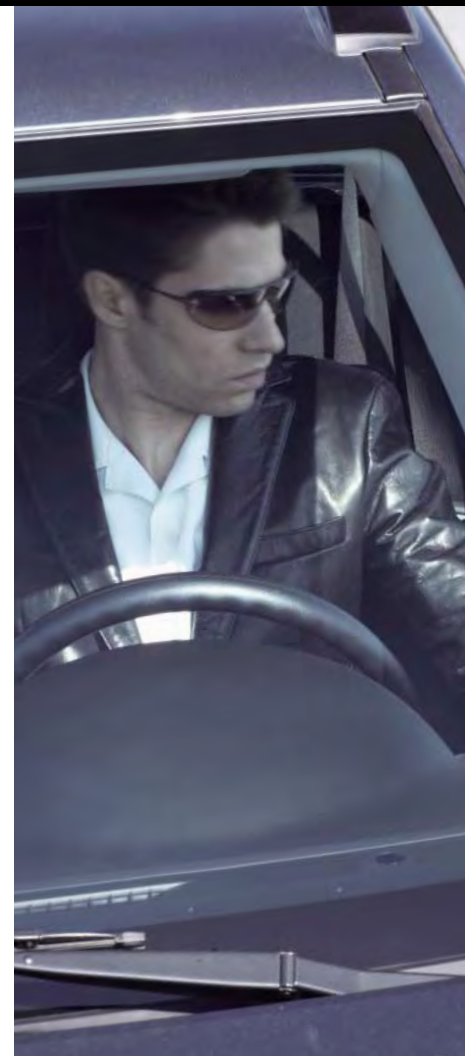

Sporty new gate designs, plus gear ratios tuned for satisfying acceleration and a smooth quiet ride, are common features of the **4- and 5-speed automatic transmissions** respectively available for the 2.0- and 2.7-litre engines.

The **"Built-in Ladder Frame" (monocoque body with built-in ladder frame)** elevates rigidity and durability, enhancing both on- and off-road performance. Unitary design minimises the squeaking common to other 4x4s.

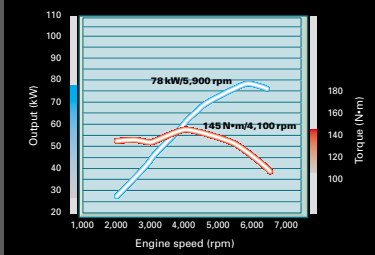

Grand Vitara's **fully independent suspension**—comprising front MacPherson struts and rear multi-links—reaches its full potential through the resistance to twisting and bending of the "Built-in Ladder Frame." The overall result is smooth and responsive on-road driving comfort, plus stable and dependable off-road traction.

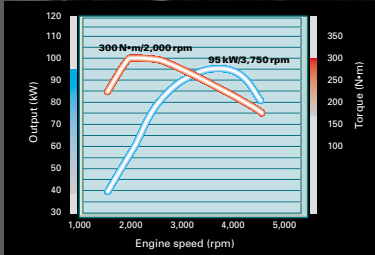

1.6-litre VVT engine
Variable valve timing (VVT) widens the effective performance range, maximising cost performance through smooth, quiet response with reduced fuel consumption.

1.9-litre DDiS engine
Broadly useful torque, an impressive 300 N·m potential, plus remarkable fuel economy; a common-rail fuel injection system boosts power and torque while helping to reduce harmful emissions. A diesel particulate filter adds compliance with the latest exhaust emissions regulations.

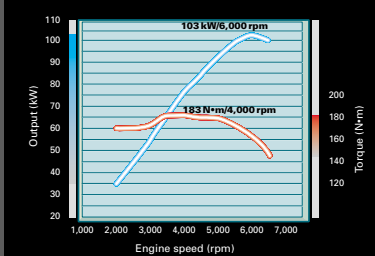

S y n e r g i c

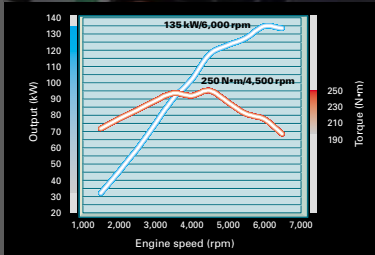

Performance and efficiency are not mutually exclusive. Neither are safety and fun, for that matter. When all primary components are dedicated to a common goal, their combined potential is astonishing.

2.0-litre petrol engine
The optimal combination of power, torque, fuel efficiency and quiet, smooth response, the 2.0-litre 16-valve DOHC petrol engine's broad effective power band expands performance potential, from off-road adventuring to motorway cruising.

2.7-litre V6 petrol engine
The 2.7-litre 24-valve V6 petrol engine provides the performance demanded by 4x4 and motoring enthusiasts. The massive torque potential is fully realised during off-roading, with long-legged top-end power boosting confidence on motorways.

The **three large cylindrical meters** are easy to read, adding to the exhilarating enjoyment of driving the Grand Vitara. Models with 4-mode 4WD feature speedometers that indicate current 4WD mode.

Cruise control switches positioned on the front of the steering wheel spoke are always conveniently at hand.

Available **high-quality audio systems** include single- and in-dash 6-CD tuners, as well as a navigation system. All factory-installed audio systems include steering wheel-integrated controls for safe and easy operation.

Fully automatic air conditioning maintains the ideal cabin ambience for increased driving enjoyment.

Empowered

When everything's within reach, nothing's been overlooked, and all systems await your command, the sensation of total control is almost overwhelming. You can handle it.

Standard for all models, advanced **rack-and-pinion tilt and power steering** enhances handling stability, cornering control and driving comfort.

The **driver's seat height-adjuster** allows all drivers to benefit from the superb cabin visibility.

Electric windows and door mirror switches are consolidated on the driver's armrest for improved control and security.

The available **sunroof** allows all occupants to experience and appreciate the elements surrounding them.

Among the many convenience features found in the Grand Vitara is an **overhead console** that's handy for storing sunglasses or concealing small valuables.

Split rear seats can be individually reclined for added passenger comfort, or tumbled forward for more space to better suit your lifestyle needs.

The Grand Vitara's luggage room is generous with utility, and features an **underfloor compartment** to help hide valuables from prying eyes.

Noise- and vibration-absorbing materials have been used wherever possible to enhance occupant comfort under various driving conditions.

5-door

Uncompromising

Some things are indispensable to the complete motoring experience. Ride comfort, occupant safety and all-round utility come immediately to mind. And are given the comprehensive attention they deserve.

Comprehensive occupant protection includes standard driver's and front passenger's **front airbags**, **seatbelt pre-tensioners** and **force-limiters**, plus available **side and curtain airbags**.

Reinforcements to cabin structure, **side-door impact bars** and **deformation-resistant members**, plus **impact-absorbing crush zones** and the "**Built-in Ladder Frame**," all direct collision energy away from the cabin. An **energy-absorption front structure** helps mitigate pedestrian injuries.

Head-impact protection is built into all pillars and upper interior surfaces in the Grand Vitara cabin to reduce head injuries in the unlikely event of an accident.

ESP®s (electronic stability program) three major functions: anti-lock braking system (ABS) with electronic brake-force distribution (EBD), traction control and stability control, enhance the Grand Vitara's directional stability under various types of road and driving conditions.

ESP® is a registered trademark of DaimlerChrysler AG.

3-door

While the Grand Vitara is all about pride of ownership and driving satisfaction, this versatile 4x4 is also smart enough to share the lifestyle, and even reflect the personality, of its proud owner.
